## Fruit Trees

There is hardly anything more satisfying than picking a fresh, juicy plum or a sweet, sun ripened peach from your own backyard. Many fruit tree varieties are not only abundant producers in our climate but they also have beautiful flowers and foliage that enhance the garden and provide shade on warm summer days. Because so many fruit tree varieties are adaptable and easy to grow, you may have difficulty choosing just one. There are dwarfs that do exceptionally well in containers if you are limited in space. Additionally, we stock espaliered varieties that can be planted in narrow spaces or along fence lines. Let us guide you on creating your own home orchard no matter how much space you might have. We have listed the varieties that we generally stock and that do well in our local climate. We also add new varieties to our inventory when growers have them available. So check the list, and if you don't see what you are looking for, visit or contact us and let us help you locate the ones you desire.

### Apples

Anna  
Fuji  
Gala-s.dwf  
Golden Delicious  
Granny Smith  
Pink Lady  
Red Delicious- s.dwarf  
Red Delicious-spur
